

# Web Site Design, Hosting & Then Under Your Control

**ONLY  
£350  
EX VAT**

We can deliver excellent web design and hosting by utilising Content Management Software. This software has been researched and developed to cater for each customer's individual corporate image and requirements, bearing in mind that this may often change after the web site has become live.

The customer can add or amend the content on the web site without the assistance of internet professionals.
